

# **You might be wondering what a man born in 1889 can teach you about how to make money online with AI in today's modern world...**

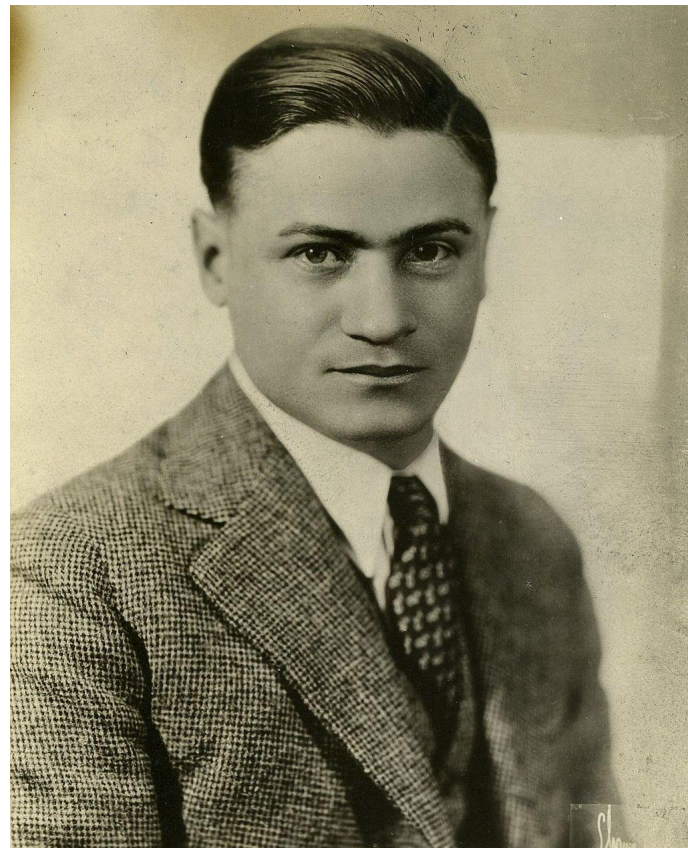

You'd be surprised, follow his lead and you just might strike it rich!

because recently, a door has opened up. And there's a limited time that we've got to exploit it.

This new opportunity lets us take brand new AI technology and then combine it with a 105 year old tried and true business strategy.

And it's by combining both the old and the new... you can generate a lot of profit.

It's really the special combination of AI and this 105 year old strategy is what makes it so highly profitable.

You're about to discover how you can  
claim YOUR share of a \$325 billion  
industry... soon growing to \$1 trillion!

One that Forbes says is “among the fastest-growing industries in the world!”

Even though it's already booming, this market is primed for even MORE unprecedented growth.

And it's wide open for YOU to profit, too!

In fact, almost ANYONE with a bit of ambition and the right guidance can claim their share of the massive fortunes being made in this market.

In fact, almost ANYONE with a bit of ambition and the right guidance can claim their share of the massive fortunes being made in this market.

The hugely lucrative opportunity I'm  
talking about today is...

Online learning!

It's such an insanely profitable opportunity that I've created dozens of digital courses during my time as an online entrepreneur.

Many of these courses have supported  
me and my family very well...

And several of them have made me  
millions, like this one:

				\$14,842,595.17

**Total: \$14,842,595.17**

After 20+ years of online entrepreneurship, why have I invested so much time creating and selling my own courses?

The answer is simple...

**HUGE growth and MASSIVE profits!**

Before you let any preconceived  
(and most likely false) notions about  
this industry creep into your brain,  
allow me to share...

Why I think online learning is  
the PERFECT business...

Why RIGHT NOW is the best  
time to get started...

And why it's NEVER been easier  
for you to enter this market and  
make yourself a FORTUNE!

In the past few years, millions of people all over the world had to change their habits overnight...

And are now turning to the  
internet to learn new things about  
every topic imaginable.

Plus, an entirely NEW audience came online, like those who didn't grow up with the internet.

Human behavior rarely changes,  
but when a transformation like this  
happens, it creates one of the  
greatest opportunities to ever exist!

This means there's a HUGE  
opportunity right now to build your  
own business from home and  
call the shots in your life.

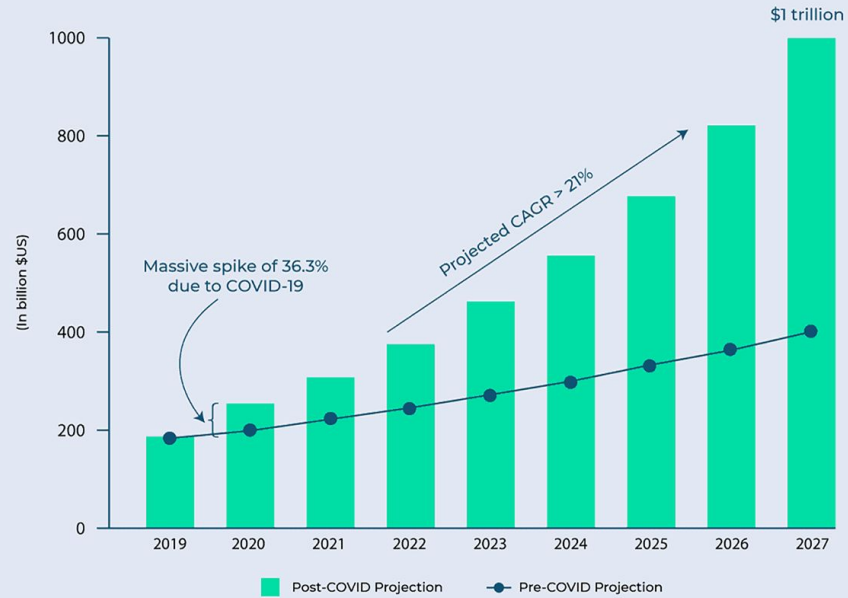

And.. there's even MORE good news!

According to the World Economic Forum, over 200 million people will be looking to enroll in online learning this year.

So not only do we have an extremely  
receptive and “hot” market...

Sales of digital courses are expected  
to top \$1 TRILLION by 2028, says  
Polaris Market Research.

## E-LEARNING MARKET GROWTH

That's why there has truly never been  
a better time to create your digital  
course and get in on the action.

Celebrities, major companies  
and everyday folks are all jumping  
into this exciting new world.

They're creating courses and making money... even in areas they're NOT experts in.

It's like everyone's discovering a  
secret way to share what they know  
and earn from it.

For example, take Mike Tyson,  
the famous boxer.

He has his own digital course called  
12 Rounds With Tyson.

# Twelve Simple Drills To Unlock A Champion's Mindset And Achieve Anything

INTRODUCING

However, it's NOT about boxing.

It's about having a success mindset,  
something Mike knows a lot about  
from being the youngest heavyweight  
champion of the world.

But there's a twist...

Mike's not teaching this stuff to other boxers. He's teaching it to people who work on the internet!

Is Mike an expert in online business?

Of course not!

But he's still succeeding.

That's the magic of what I call...

“Profit Syncing!”

With “Profit Syncing,” you don’t have  
to be the top expert at something  
to make money.

You just need to spot what's  
hot and trending.

Then, you let AI create content  
about these trends for you.

It's like having a superpower that  
makes sure you create a course  
that people WANT to buy.

You can make money from things you already love and know a lot about... like gardening, painting, or even cooking.

Or, if you're not sure what  
topic to choose yet...

You can use AI to identify popular trends and niches where you can make money... even if you're just learning about it yourself.

This is how regular folks from all walks of life are getting into the game and generating profit in markets they know absolutely nothing about.

Are you starting to see why combining AI and digital courses could be the single greatest opportunity of our generation?

These past few months, I've spent  
a LOT of time and money figuring out  
this whole AI thing.

You've probably seen the chatbots,  
the image generators, or the  
text-to-speech tools.

It's a hot topic right now.

IN 2023 TO BECOME A MILLIONAIRE

But while there's a lot of excitement  
around the technology...

There's very little in the way of practical,  
money-making application of it.

Most right now are using AI for very simple things that may or may not make money.

In other words, “artificial intelligence”  
is not particularly intelligent  
in their hands...

And a LOT of profit potential  
is being wasted.

Now, let's move on and address one of the most pressing questions people have about this model. And that is...

“Can I REALLY use AI to build a high quality digital course?” 🤔

Did you know that AI recently  
passed the Bar Exam?

It's true.

Not only did AI pass this challenging legal exam, but it did so by a HUGE margin, beating humans in 5 of 7 subject areas.

Its astonishing score of 297 puts it  
in the top 10% of test-takers.

Think about it...

If AI is smart enough to excel in law,  
then imagine how powerful it can be  
when it comes to helping you  
craft digital courses!

It essentially knows the sum of  
ALL human knowledge.

But... you need to know how to harness  
this power in order to profit from it.

The secret is knowing how to “prompt”  
and guide the AI so you can tease the  
RIGHT information out of it...

And then presenting that information  
in a way that's helpful and easy to  
understand, so that it's incredibly  
valuable to the audience you  
choose to serve.

And that's EXACTLY what I'm going  
show you in this 5-day  
LIVE challenge!
